All new service lines and appurtenances must be installed in accordance with EWW specifications and inspected by an EWW Engineering Inspector. Standard construction details and other pertinent information are available at www.eriewater.org/engineering. **Inspection requests must be made with 24 hours prior notice by calling the Engineering Department at 870-8000, Ext. 206, 205, 204, 203, 241, or 207** between the hours of 8 a.m. to 5 p.m. Same-day inspection requests may not be possible and could be subject to an additional fee. Only EWW Employees can activate water service. Unauthorized activation / turn-offs are subject to a \$500 fine.

If a private well will supply this property (but not the building obtaining EWW water service) after obtaining EWW water service, it is expressly understood and agreed that the well pump and all connections to interior plumbing of the building must be removed, inspected by an EWW Inspector, and an approved backflow prevention assembly installed at the meter to protect the EWW water system and its customers. Any other use of the water shall be considered theft of services and subject to penalty.

If an existing tap is to be used and for any reason EWW determines that the tap is NOT USEABLE due to age, material, or other reason, a new tap must be installed and all applicable fees must be paid by applicant prior to installation of the new tap by EWW.

Water service may be provided during construction pursuant to a monthly fee. Water provided to a building under construction shall be used only in said building and with EWW approved backflow prevention. Any other use of the water shall be considered theft of services. A monthly Construction Water Fee will be charged until a water meter is set. A water meter shall be installed on new construction as soon as practical.

By signing this Application, the applicant agrees to abide by the Rules and Regulations of EWW, in particular the provisions governing the terms, conditions, fees and charges relating to water service. Fees for services 4" and larger are considered deposits and actual costs will be charged with applicable reimbursements made to applicant or additional charges being billed to the applicant.
